

The Belle Glade Express

News From Your TOWN HALL

Another Belle Glade child is stricken with polio, and there seems to be something we can do about it. The entire City and immediate surrounding areas of Chosen can be spread with DDT and done quickly.

There is a man at the Experiment Station who is working with Dr. Allison in killing hyacinths who do not work at the pond and the waterable DDT is available.

Some scientists seem to think flies carry the germ; we can eliminate flies, mosquitoes, and roaches, etc., by this and take to steps towards polio prevention.

If you think well of the idea speak to your City Commissioner.

GI School Plans Are Given Green Light

Harry Wood, State Director of Agricultural Training for GI, under Colin English, reports that plans are progressing very well to secure an Agricultural Training Center for Belle Glade for GIs.

During the Legion convention in West Palm Beach, Stuart, Eddy, GI Training Officer, met with the County School Board at the suggestion of the local Veterans Service Committee, and discussed in detail the methods of handling the actual operation of the school. Mr. Wood has discussed the necessary steps with County Superintendent John Leonard at length.

As teacher Davidson, of the local school, and County Agent Mounts, are the hubs around which the local set-up will revolve, Mounts will be chairman of the controlling committee, with Prof. Davidson active in its operation.

Administrator Collins of the Veterans Bureau at Passaic, N. J., is being invited to meet with the local Veterans Service Committee in an effort to work out details, as this is the first unit to be established in the State.

Colors Of 1947 Car Tags

The State Highway Department, which has charge of the making and distribution of automobile tags, which are awarded at the Raleigh, N. C., state, that the 1947 tags will have cream colored numerals on a dark green background, with the word "Florida" running down the side. The department will produce an initial supply of 700,000 tags, and later, more if required. In the four months of the present year the department has derived ten and a half million dollars in revenue, or a million and a half more than the entire year's take in 1945.

State Desires County To Form a New Health Union Per Its Plan

Palm Beach county is one of the counties of the state which does not have a unified health organization, although there has been much agitation over the need of such an organization.

The State Board of Health, through one of its field agents, has presented a program of action leading to the formation of such a body. The plan suggests uniting all health organizations to work under a sort of community center plan, and while it would take considerable time and money to effect such a plan, in the long run both county and the sick and crippled would be greatly benefited and better supervised and given all types of care coming under the supervision. The plan has been presented to the county commissioners for consideration.

County Convention Entertained By Belle Glade Club

The Belle Glade Home Demonstration Club was hostess to the Palm Beach County Home Demonstration Club on Thursday, May 16, at the Community Methodist church, Mrs. Hugh J. Bradley presiding.

The meeting opened with an extensive display of county accomplishments and activities by the eight active clubs in the county. Mrs. Margaret H. Nichols, of Military Trail presented the county report on canning; Mrs. (Continued on Page 2)

Legion Has Grand Convention At West Palm Beach

The 1946 convention of the Florida American Legion was held at West Palm Beach last week and was largely attended by the local legionnaires.

The big parade on Friday was participated in by around 2000 of the legionnaires, and despite the inclement weather they had a whale of a good time. The parade was a fine success, lining the line of march.

One of the orders of business that interested Glades poets was that the state was divided into ten representative districts. District No. 9 will consist of posts and auxiliaries at Hollywood, Ft. Lauderdale, Lake Worth, West Palm Beach, Stuart, Fort Pierce, Okeechobee, Pahokee and Belle Glade.

Legal Holidays For Elections

DeWitt Uphegrove, county clerk, registered voters, and a new idea which he thinks will bring out more voters on election days. That is to have the legislature establish such days as full or half holidays, so that business duties will not keep voters away from the polls. (With such a law the registrar does from 75 to 90 per cent of registered voters could and would go to the polls.)

Cattlemen's Field Day Proved The Best In History

Nested Specialists Gave Information On Cattle Raising Projects

The annual cattle show at the Experiment Station was held on Thursday, May 16, and attendance was the largest that has ever been recorded at this educational event. Everything passed off pleasantly, except the noon hour rain, which partially wrecked the service of the dinner prepared by the PTA women, and all declared it a manner most.

County Agent M. U. Mounts, acting as chairman, got the program started and he introduced Dr. R. V. Allison, who spoke briefly.

That the attendees might have record of what was produced by experimentation at the station the past year, by the county experts, an eleven page program had been prepared for their use, and it was an excellent one.

The morning program was participated in by State Department of Agriculture specialists and Everglades stations, all of whom gave excellent addresses on topics chosen by the speakers. The speakers drew mostly on phases of nutrients for plants and animals. The speakers were Dr. R. A. Bair, R. W. Kidder, T. C. Irvin, George K. Davis, E. S. Swanson and Charles E. Scott.

An hour was taken to inspect the group of animals which Dr. Kidder and spoken about, as well as the various grass plots, and an exhibit of the Scammon silage and mole drain machine, and the latter amazed all with their wonderful work and effective manner in which they cut up and soil, grass, roots and hard earth.

Those appearing on the afternoon program were Dr. L. Lewis, W. T. Forster and R. A. Bair, along with field inspectors.

Exciting talks from the program as prepared by the station faculty, including the following:

Small Grass-Plot Trials

Twenty-six separate treatments of fertilizers and trace elements were applied to St. Augustine, Coastal Bermuda, (Continued on Page 3)

Cattlemen Hold Postmortem On Field Day Program

The Palm Beach County Cattlemen's Association held a special meeting Friday night when it had national and state authorities on forage and husbandry to be applied to the Glades cattle men. In short, the meeting turned into a post mortem and extension of the program held earlier in the day at the Experiment Station.

The first portion of the evening was spent on nutrition as affected by non-metal nutrients, and the speakers were those which had received such treatment, and the proportions of copper to be applied and fed. That word copper, along with chemical combinations, has been a word in cattle related and it seems to be the one and only remedy now available to bring cattle out of their lethargy. (Continued on Page 7)

No Loaning Of County Machinery

County Commissioner Paul Bair, who represents the Glades district, has given out the fact that none of the new equipment secured for the district will be loaned to any party, corporation or institution, for any purpose, as it must be used on county work, for which it was purchased.

Mrs. Zach Ingram Passes Away After A Long Illness

After a life began 55 years ago, and enduring a lingering illness of more than two years, Mrs. Harriet Lackey Ingram, wife of Zach T. Ingram, of this city, passed away at a hospital in West Palm Beach on Thursday morning, where she had been a patient.

The news of the death of this esteemed lady brought much regret in the large circle of friends she had made during her long residence in this city, for her active days she took a keen interest in church and social affairs of the city and was a woman universally respected.

Mrs. Ingram was born at Knoxville, Tenn., on July 16, 1891, and came with her husband to Belle Glade in 1931, where the latter has been engaged in farming.

The surviving members of the family are the husband, one daughter, Mrs. M. H. Morales, of Toole, Utah, and a son, M. E. Foster, of West Palm Beach. Funeral services were held at the Ferguson chapel in West Palm Beach on Thursday afternoon, in charge of Rev. L. E. Borchardt, pastor of the First Baptist church, as officiating clergyman. Burial was made at Woodlawn cemetery.

Old friends who served as pall bearers were W. E. Schleuter, L. W. Cunningham, E. E. Jones, J. K. Baker, Billy Webb, and V. L. Jones.

Plans About Ready For Farm Shelter And Pavilion House

While in attendance at the Cattlemen's Field Day last Thursday, L. H. Lewis gave information on the state's program concerning the status of the South Florida Agriculture Auditorium and Pavilion. This exciting project, one of the five plans are planned for the Experiment Station in Belle Glade.

Dr. Lewis, who is one of the department handling the requisitions for all of the buildings have been planned and will be built to meet the particular needs of the station.

While all will be of a similar architectural plan, they will be arranged to provide all the provisions that have been requested by the various communities to meet their requirements.

The plans for the Quincey pavilion are now about complete and that for Belle Glade more than half finished, and when these are completed they will be given final commission.

So far as the Belle Glade pavilion and auditorium is concerned, we plan to provide for every need for farm, cattle and other lines of agricultural demand, and facilities in the way of auditorium offices, consultation rooms, dining room and kitchen. The committee realizes that this station plant will serve a double purpose, both as a show place and a convention hall, and how nice it would be if the building had been available on this occasion, when the weather was so rude. In some ways it will have been a pity that the other pavilions will not possess, and it is likely that this treatment will be very generous in the future, if the local people raise their support to the state, making it possible for an enlarged plant.

Stuart Trims Belle Glade

The second round of play in the Lake-Est Coast base ball league took place last Sunday and games resulted as follows: Pompano 2, Morrison Field 0; Lake Worth 3, Boynton 1; Stuart 8, Belle Glade 7. Clewiston was rained out at Pahokee.

The game at Stuart was one of those nip and tuck affairs, but the Martin county lads had a little better luck, playing Belle Glade at Okeechobee camp and next Sunday at 3 o'clock.

Half Million Dollar Expansion Planned In Terminal Sector

Borchardt Corporation Takes An Option On Canning Plant

Industrial expansion in the Belle Glade area just won't cease, and the new terminal sector, opened last year is going to become a more attractive import as the new industries locate in this territory.

Last year the Borchardt and the American Fruit Growers added large new packing houses and found inadequate in some measures, and the Glades Appliance Corporation has also increased its industries over there, and several more are contemplated.

L. E. Borchardt of the Borchardt Corporation, Monday released the story that his firm had taken an option on the new terminal sector, which is the new Glades Canning plant, which during war years was operated for the canning of produce, and the new plant is to be a new half million dollar improvement and expansion which will include carrots, peas and that plant during the summer.

It is the intent to not only add new machinery for the canning of a diversified line of food products grown on Glades farms which will include carrots, peas and that plant during the summer.

Truck Wrecked Near Bean City

John Savannah, a colored truck driver from near in the settlement, had his machine severely wrecked west of South Bay, Sunday evening. The truck had been parked along the highway pulled out directly in front of his machine, and to avoid striking it, he had to do some quick maneuvering, and landed over the side of the road, taking place on a serious injury. The State Road patrol reported on the scene to make investigation and give aid.

New Sandwich Shop To Open

Owen Godwin, who recently came to Belle Glade from Lakeland, has leased a former J. N. lunch counter location, and is now refurbishing it with new wares and equipment. Mr. Godwin will operate a sandwich and fresh fruit juice bar, where customers will be served.

Mr. Godwin is already a well-known stand over in colored town and expects to install a number of new sandwiches stands throughout the Glades.

Commissioner Ricou Makes Open Statement To Sportsmen

Earl Ricou, chief enforcement officer for the 4th district of the Florida Fresh Water and Game Commission, has made an open statement to the sportsmen of the state, that he was from the Stuart home last Wednesday, to be speaker at the Lions club, and to be a speaker at the important message and appeal to sportsmen of the area. He stated that the commission was one of the orphan organizations of the state, as the latter paid not a cent for its support or maintenance, but it was from license fees from fishing and hunting licenses, its only source of revenue for the maintenance of the state, and he stated that this source will total around \$700,000 this year.

The administrator stated that Florida was the sportsman's playground from all over the state, and we were to protect our fish and game resources and still increase the supply for the revenue of the state. The official pointed out that it was up to the towns of the state to organize and take care of their own sports, and he urged that one be formed in both Belle Glade and Pahokee, for it was by force of number and also that of commercial patrons.

Commencement Exercises To Be Held Wednesday

The largest Senior class to ever graduate from the Belle Glade High School will take part in commencement exercises Wednesday, May 29, in the auditorium. Thirty-nine Seniors, attired in their caps and gowns, will present their diplomas by Carmen Salvatore following the commencement address by Dr. Russell A. Williams.

The Rev. I. E. Enlow will deliver the invocation and the Rev. B. A. Oswell the benediction. Barnes G. Smith, Jr., will give the salutatory address and Mary Elizabeth Hooker is valedictorian. (Continued on Page 4)

Sportsmen To Form A New Club For Area

An important meeting of the sportsmen of Belle Glade and vicinity will be held at the local city hall at 8:30 this Friday night, when steps will be taken to form a new club or revive the former Wildlife organization of a few years ago, which has been dormant during the war years.

Earl Ricou, of Stuart, state conservation director of the Fresh Water Fish and Game Commission, will be present to present information and a technical picture relating to wildlife life will be shown.

The Wild Wildlife league at West Palm Beach has been revived and organized, and Pahokee is to take similar action with its club, and the State Game Department desires a similar organization for Belle Glade area.

Growing Agitation For Central State Speed Highway

While the state is already busy on the details of rebuilding a fast four lane highway from Jacksonville to Miami, which will be a fine accomplishment for motorists when completed, yet there is a stirring of growing agitation for another direct fast route from Jennings to Miami, which would traverse parts of the Glades, Hendry, Palm Beach, Broward and Dade counties.

This is now known as Route 19, much of which is provided with excellent roads, especially in the north and south ends. It also crosses many of the best and west highways leading to the main cities of the east and south.

The route leads from Jennings to Lakes City, Ocala, Orlando, Haynes City, Childs and around the west side of Lake Okeechobee to South Bay and then south over Route 26 to Ft. Lauderdale and Miami and on to Key West.

The state will need to build in some new widened sections on the route, possibly off the present route, but it will pay in the long run and give tourists an optional route from the east or west coasts. Watch Chambers of Commerce wake up in road improvement and extension, as some cities set up howls because they may be sidetracked.

Seeks To Locate Missing Daughter

Mrs. Emma Butterworth, of Philadelphia, Pa., has asked county and local police to help locate her 17 year old daughter, Christina Butterworth, alias Martha McCarthy, who left her home last January. The girl was last seen leaving from Belle Glade, but communications sent to her here have not been picked up by the girl.

Slaughter House Proposed

J. A. Pike, who farms and raises cattle on lands just beyond the southwest city limits, has plans for the erection of a modern slaughter house and meat packing plant, where he would employ the state and city sanitary regulations. He will do his own butchering and also that of commercial patrons.

Mayo's Plan Accepted By Board Unanimously When EDD Board And Owners Make Request

Unique Situation Prevails When Landowners Offer To Help Selves

The I. I. Board agreed "to sell to highland owners the lands between the meander line and the proposed dike around the islands—Kremer, Torry and Ritta, and to contribute the proceeds of said sale towards a dike to be built jointly by the owners, the State and the U. S. Engineers" or wards to this effect.

The plan, which has been

Celery Growers Will Seek Control Program For 46-47

Speaking on trends of farming and marketing conditions, Mr. E. Borchardt, one of the progressive farmers of the Glades, stated that he was re- gretful to see that industrialists and agriculturists were trending toward the establishment of controls in their businesses. He stated he was very much against such a proceeding, as he could not see the necessity or sense in such a move. That after a man or corporation had expended their money for their farms, equipment, crops and other purposes, they should be permitted to have the benefit of their outlay and crops raised, making what they could, rather than to have it controlled by outside interests, for such control create a false market and cause growers heavy losses. Such agreement causes laziness and waste.

Colin English, though not a member of the I. I. Board, urged the making what they could, rather than to have it controlled by outside interests, for such control create a false market and cause growers heavy losses. Such agreement causes laziness and waste.

Speaking of his farm operations for next year, Mr. Borchardt stated that his plan called for plantings in volume as related to the average national crop plantings of 1946. Average has been planted the past few years on a war time necessity, but now a revision is needed to meet actual market demands of today. We plan to plant to bring on quantity and quality crops, and take our chance on the market.

The New York Produce News has this story from Belle Glade in a recent issue:

The past season has been filled with woes for growers. It began with a hurricane, followed by damaging rains, and then by the winter. Recently tomatoes rotted in the field due to lack of demand. Celery, too, suffered from low prices most of the time. Recent weeks have had too much hot weather and rain, with slow demand for remaining supplies.

By next fall enthusiasm will be noted again in this section, as plans for the first crop of modern, meaningful and modern slaughter house and meat packing plant, where he would employ the state and city sanitary regulations. He will do his own butchering and also that of commercial patrons.

There are approximately 1500 acres of highland and there will be approximately 1500 acres of the land acquired by the present owners. The price of sale is to be \$50 per acre.

R. V. Cress, president of the Islands Improvement Association, Roscoe Braddock, a member and local representative, each member of the Board on Monday, as well as Fred Elliott, the Engineer, and the Board of the Mayo plan which was considered on Tuesday at the regular meeting.

Mr. Mayo was absent on account of illness and Colonel Lee was called home on account of illness in his family. General Tom Watson made the motion and Treasurer Larsen seconded with an unanimous vote registered after Fred Elliott and Chairman Hilsabeck of the Everglades Board favorably remarked on the plan.

Colin English, though not a member of the I. I. Board, urged the making what they could, rather than to have it controlled by outside interests, for such control create a false market and cause growers heavy losses. Such agreement causes laziness and waste.

OBSERVATION and Comment By John M. Gladhill

Dealers in meats have had new instructions from the city health authorities, that in the future, old meat must be held in this area even five days more to the garbage truck comes around on collection trips, rather than have not been from the garbage containers, there to be vermin and flies.

Postmaster George Farnell received a letter from Greece which bore this address: "Mr. Belle Glade, Belle Glade, Florida." It was finally determined that the letter was intended for Paul John, and was from a cousin he had not heard from since the early days of war in Greece. In the rear of the envelope were five large maps, the Greek memorial stamp honoring the late President Franklin D. Roosevelt. The picture was an outstanding one of the

CATTLEMEN'S FIELD DAY

Continued from page 1
Pangloss grass and field corn on new savanah land as a basis for nutritional studies with both plants and animals.

All four varieties eventually died and were replaced naturally by St. Lucie Bermuda grass in every plot where no copper had been applied. However, there was a big difference in the varieties as to the length of time they could live without added copper.

Animal Nutrition Studies

A herd of grade Devon cows was kept for two and a half years on one of the older, well fertilized pastures without any supplement to the grass. Water or summer with access only to plain white salt. They reproduced normally and most of their calves grew normally. In October they were placed on a St. Augustine pasture grown on freshly broken savanah soil without fertilization. Nutritional deficiency symptoms developed in three months. Part of the herd was treated with copper in January, February and March. Treatment of the others was delayed until April. The effectiveness of this treatment was demonstrated by the cows in the west pen near the barn.

Weed Control Studies

The new hormone weed killer, 2,4-D has been tested in several spraying experiments in various concentrations ranging from 2 to 3.5 pounds actual 2,4-D per acre, on several common lawn and pasture weeds. Sprays were applied at the rate of 200 gallons per acre.

This chemical has the remarkable ability to kill most broad leaf weeds without doing appreciable harm to grasses. It also has been found non-toxic to animals. From the results of trials to date it appears that many of our important weeds can be readily killed by a spray application of about 1.5 to 2.5 pounds of 2,4-D made up to 200 gallons per acre. This herbicide has given effective results against many weeds.

McTaggart's Views

Phone 210 Herald Bldg.

icide has given effective results against many weeds.

The principal findings obtained to date are as follows:

1. Sprays gave better results than darts at the same rates of application.

2. A satisfactory kill of hyacinths was obtained by spraying at the rate of 1.7 pounds of 2,4-D in 200 gallons of water per acre (1000 parts per gallon).

3. After spraying a pronounced wilting was obtained in seven days, and death of the plants in four to five weeks.

Spraying by Plane

Water hyacinths in the Hillsboro canal, were sprayed by plane with 2,4-D in concentrations ranging from 7 to 1.7 lbs. of actual 2,4-D per acre. Half mile stretches of the canal between the Six Mile and the Twenty Mile Bend were sprayed by W. M. Rahn of Air Spray, Inc., and in the case of these experiments the total spray application was at the rate of two gallons per acre instead of 200 gallons per acre, as was used with the ground spraying trials.

The results so far obtained are very encouraging and the indications are that a satisfactory kill will be obtained from a spray application of 1.7 lbs. of actual 2,4-D in 200 gallons water per acre.

Animal Breeding Project

The pure bred Devon herd consists of 44 cows and heifers of breeding age, 4 bulls, and 26 head of purebred young stock. By using a purebred Devon bull we are studying the possibilities of establishing a polled strain in this breed. The Experiment Station is increasing its herd of Devon Brahman cross-breeds and also obtained choice calves this season from Devon cows and an Africander bull owned by T. J. Durranne. The Africander steers weigh more than 400 pounds at five months.

The work with the Brahman breed has recently been considerably expanded by the purchase of ten purebred heifers from Vandam Brothers at Belle Glade. Our Brahman sire, David, weighs 1325 pounds and will be three years old in July.

There are available for sale eight purebred Devon bulls varying in age from seven and one half to twenty-two months, weighing up to 700 pounds.

Twelve native steers were purchased from Stuart Norton in April 1945 and carried for six months in the grazing trials. Their average gain was 210 pounds each. About November 1st, 36 steers were obtained from the Range Cattle Experiment Station, Ona, and combined with two grade Devons and 12 X-Non steers. These were carried for two months on the 25 acres of St. Augustine grass without supplement other than minerals. The 36 Ona steers lost an average of 34.6 pounds each in moving from Hardee county to Belle Glade. In the two months they made an average gain of 33.6 pounds, besides regaining the shrink or a total of 88.2 pounds based on arrival.

The feeding trial started Jan. 7th following a 10 day preliminary period. The substantial co-operation of the U. S. Sugar Corporation is greatly appreciated in furnishing the sweet potato feed for Lot 5, allowing us to dig the sweet potatoes for Lot 4 and giving us special consideration in the purchase of molasses for all the cattle. As shown in the table of results that follows, all of the cattle grazed St. Augustine grass and were fed 2 pounds of cottonseed meal per day. In addition Lot 1 received equal parts of ground snapper corn and molasses, Lot 2 received corn and molasses in the proportion of 1 to 3, Lot 3 had no corn, but had all the molasses they would eat from a self feeder. Lot 4 received equal parts of dried sweet potatoes and molasses, and Lot 5 received equal parts of sweet potato feed and molasses.

The rates of gain placed Lot 1 first, Lot 4 second, Lot 2 third, Lot 5 fourth and Lot 3 fifth.

According to Morrison's "Feeds and Feeding," with corn at \$66 and cottonseed at \$50.50 per ton, molasses should be worth \$46.70. Based on percentage gains of the steers in this trial the sweet potatoes should be worth 91.7 per cent of the value of corn or \$60.50 per ton. On the same basis the sweet potato feed was worth 83 per cent of corn or \$54.80 per ton. Perhaps the molasses and sweet potato feeds are more nearly priced with cattle values and the corn price is inflated.

The amount of grass consumed is calculated from the analysis and nutritive values of the feeds along with the nutrient requirements for maintenance and gains of animals of this size. The method is somewhat

technical but logical and accurate. It shows that the grass provided for the maintenance of the steers and the concentrates fed produced results.

Secret Corn Improvement

Two types of work are being carried on with sweet corn. Several commercial varieties are being tested for yielding ability, adaptability to this climate and for resistance to budworm and earworm.

Field Corn Improvement Studies

Six hundred varieties, strains, single crosses and inbreds are under test to develop a new hybrid corn suitable for the muck soils of South Florida. Although 113 bushels of shelled corn per acre have been obtained with our Big Joe variety this corn lacks several desirable characteristics such as uniform maturity, ear height, kernel color and length of husk. All inbreds that are known to possess budworm resistance are under test in the plots.

One acre is planted to Mayohuel, a Puerto Rican variety which is the foundation stock for Big Joe and for the hybrid breeding program at this Station.

Small Grain Trials

Oats, barley and wheat grown from seed produced at this Station can be seen in the small grain plots. Varieties are being selected for use as temporary winter pastures and as grain producers.

Pasture Grass Nursery

Arrangements have been made with all the known grass breeders of the United States to send their new varieties to the Everglades Experiment Station for

K & K SALES COMPANY

534 Pittsburgh Life Bldg. Dept. Pittsburgh 22, Pa.

Island Landscape Company

We wish to thank our many friends in the Glades for the business which they have given us in the past and for their understanding and helpful attitude toward us during the years while we were mainly engaged in the preparation and maintenance of Airfields for the Army and Navy.

Once again we are able to resume peacetime operations and offer you the same efficient and courteous service which has been our endeavor to render in the past. The service we offer is complete, from landscape designing to a finished planting job. Our Nurseries are stocked with a wealth of lovely trees, shrubs, vines, potted plants, etc., awaiting your selection.

We invite you to stop in and visit us at any time and will appreciate your continued business.

NURSERIES: 100 Southern Boulevard (Route No. 25 at City Limits), West Palm Beach, Florida.

E. TINSLEY HALTER, President.

New GASOLINE

Power-Packed

100-OCTANE COMPONENTS

WITH

100-OCTANE COMPONENTS

Now you can enjoy...in your car...the smooth, surging power that aviation gasoline gave to war planes. For new Sinclair Gasoline is POWER-PACKED with 100-OCTANE components.

Yes, the same 100-OCTANE components as were used in making the world's most powerful gasoline for war planes are now blended into new Sinclair Gasoline for your car. That's why we believe you'll find new Sinclair Gasoline the most

POWER-PACKED gasoline you have ever used.

Ask your Sinclair Dealer today for a tankful of new Sinclair "H-C" or new Sinclair Ethyl Gasoline. See for yourself how its quicker-starting, higher-octane, POWER-PACKED performance makes cars fairly fly.
